

Fear, and Loathing in Las Vegas - Jumpo Around

Tom: **A**

Intro: **Eb Ab Bm Bb**

Summer has now come
Eb

Wow!

The time to jump at the beach has now arrived

Come on, lets play with us

Why don't we hop around the hot summer shore

Forget all the boring stuff we got to care and have fun

The sun shines bright upon the sky

Tanning our skin hot and brown

This place is our play ground for us to play

Everyday we have to bother with many shifts

I know how it really suck but for

Now why not party and jump all night long with us

I get how you feel so dull to face problems you would never want

But for now lets jump and sing all night long

Jump now!

Shake the floor and shake the earth with both of your feet

Create and feel the beat

Jump as high as the sky

(**Eb Ab Bm Bb**)

Eb Ab

The sun is falling into the blue ocean

Coloring the scenery into orange but its not over

Even if the round glowing moon comes rising

The fun never ends and will last forever

Lets dance

Jump until next morning

Party all day

Lets all hold hands and jump around the fire

Do not be scared

You can always come back here anytime

We won't leave you so do not worry

This place will stay forever

Stars shine and light from up high

Telling us that the party will not end

Hey, are you ready to jump now?

We have to bother with many shifts

I know how it really suck but for now why not party

And jump all night long with us

I get how you feel so dull to face problems you would never want

But for now lets jump and sing all night long

Jump now!
