

Fletcher - Wasted Youth

```
Tom: Bb
                                                                Until tomorrow comes
 (com acordes na forma de G )
Capostraste na 3ª casa
                                                                This is how we run
 We got a lot of time to get it right
It feels good to mess it up, maybe don't think about it
                                                                So take the good stuff, honey
Going late night who needs a fantasy
                                                                The money just won't buy
Buzzing on Hennessy
                                                                Spend it up however we like
           D
Class like a Kennedy
                                                                So take the good stuff, honey
And you're my nation, my revolution
                                                                The money just won't buy
Living right now, well you can call it disillusioned
                                                                Don't try to save us
                                                                Cause we're doing it right
Until tomorrow comes
                                                                We are, we are the wasted youth
This is how we run
                                                                                  Em
                                                                We are, we are the wasted youth
So take the good stuff, honey
                                                                It's my life
The money just won't buy
                                                                If I'm gonna waste it
Spend it up however we like
                                                                Gonna waste it on you
So take the good stuff, honey
                                                                It's my life
The money just won't buy
                                                                If I'm gonna waste it
Don't try to save us
                                                                I'll be wasted on you
Cause we're doing it right
                  Em
We are, we are the wasted youth
                                                                I tell myself
                  Em
We are, we are the wasted youth
                                                                If I'm gonna fall
It's my life
                                                                It'll be from high places
                                                                Even when it hurts
If I'm gonna waste it
                                                                At least we loved hard
Gonna waste it on you
                                                                Didn't we, baby?
It's my life
                                                                                   Fm
If I'm gonna waste it
                                                                We are, we are the wasted youth
                                                                                  Em
I'll be wasted on you
                                                                We are, we are the wasted youth
                                                                                  Em D
                                                                We are, we are the wasted youth
Look what you did to me
                                                                                  Em
                                                                We are, we are the wasted youth
A rebel born free
     G
Running wild through the concrete jungle
                                                                It's my life
Now I can't seem to stay away
                                                                If I'm gonna waste it
Hell, I know that I'm gonna pay \ensuremath{\mathsf{I}}
                                                                Gonna waste it on you
But I do it anyway
                                                                It's my life
You're the ultimate high that I'm tripping on
                                                                If I'm gonna waste it
You're the edge of the cliff that I'm hanging on
                                                                I'll be wasted on you
```
