

Frank Ocean - Ivy

Tom: C

I thought that I was dreaming when you said you love me

The start of nothing

I had no chance to prepare

I couldn't see you coming

The start of nothing new

I could hate you now

It's quite alright to hate me now

When we both know that deep down

The feeling still deep down is good

[Verso 1]

If I could see the walls, I could see you faking

If you could see my thoughts you would see your face is

Safe in my rental like an army truck back then

We didn't give a fuck back then

I ain't a kid no more

We'll never be those kids again

We drove to Syd's, had the X6 back then

Back then

No matter what I did

My waves wouldn't dip back then

Everything sucked back then

We were friends

I thought that I was dreaming when you said you love me

The start of nothing

I had no chance to prepare

I couldn't see you coming

The start of nothing new

I could hate you now

It's quite alright to hate me now

When we both know that deep down

The feeling still deep down is good

[Verso 2]
(Igual ao verso 1)

In the halls of your hotel

Arm around my shoulder so I could tell

How much I meant to... meant it sincere back then

We had time to kill back then

You ain't a kid no more

We'll never be those kids again

It's not the same, ivory's illegal

Don't you remember?

I broke your heart last week

You'll probably feel better by the weekend

Still remember, had you going crazy

Screaming my name

The feeling deep down is good

(Igual ao verso 1)

I thought that I was dreaming when you said you love me

It started from nothing

I had no chance to prepare

I couldn't see you coming

And we started from nothing

I could hate you now

It's alright to hate me now

When we both know that deep down

The feeling still deep down is good

[Verso 3]
(Igual ao verso 1)

All the things I didn't mean to say

I didn't mean to do

There were things you didn't need to say

You didn't need to... need to

I could dream all night

Dream all night

I could drive all night

Drive all night

Dreaming, dream on

Acordes
