

Fun. - Out On The Town

```
Tom: C
                                                             I just wish that it never came true
I set all my regrets on fire
                                                             I was out on the town
                                                                  Am
Cause I know I'll never take the time
To unpack my missteps and call all of our friends
                                                                    Am
I figure they would take your side
I make the bed, just not that well
                                                              Am G
                                                             Oh no, what have I done?
Your name comes up a lot
When I talk to my mom
Oh, I think she can tell
                                                                    C
I was out on the town
     Am
So I came to your window last night
I tried not to throw stones
      Am
But I wanted to come inside
                                                             (C, Am, F, G)
Now I'm causing a scene, thinking you need a reason to smile
 Am G F
Oh no, what have I done?
               G
There's no one to keep me warm
So maybe I should put up a fight
              G
I'll call them back and borrow a box knife
So I can learn to live with all the stupid s I've been doing
since '99
                                                             heart
And I know I could be more clever
And I know I could be more strong
                                                             I was out on the town
But I'm waiting for the day you come back and say
                                                                   C
"Hey, maybe I should change my mind"
                                                                    Am
I drink a lot
I'm not sure if that's new
                                                              Am G
                                                             Oh no, what have I done?
But these days when I wake up from a night I forgot
                                                                          G
```

Acordes

So I came to your window last night I tried not to throw stones But I wanted to come inside Now I'm causing a scene, thinking you need a reason to smile There's no one to keep me warm And I know I could be more clever And I know I could be more strong And I know I could be more clever And I know I could be more clever I knew there would come a day when all was said and done (And I know I could be more clever) Everything I was is everything but gone (And I know I could be more strong) All my big mistakes are bouncing off your wall (And I know I could be more clever) The bottles never break, the sorrow never comes (And I know I could be more clever) So come on let me in, I will be the sun (And I know I could be more clever) I will wake you up, I am who I was (And I know I could be more strong) Just open up your heart, open up your heart, open up your (And I know I could be more clever And I know I could be more So I came to your window last night I tried not to throw stones But I wanted to come inside Now I'm causing a scene, thinking you need a reason to smile There's no one to keep me warm
