

# Gabriel Gonçalves - Hope Alive

tom:  
Intro: Em C Am Bm

I saw the hardened ground, a land so bare  
Yet still I tried to find something there  
With weary hands, I held my stance

Even when the world said  
Quit, don't take the chance

They said: you won't succeed  
But what is born through faith  
Doesn't follow numbers  
And makes no mistakes

Through the months of struggle, of waiting, of pain  
In the hardship and losses, the lessons that I gained  
But it was will that made the roots grow strong inside

And now I see the storm that I can't hide

And the strength kept pushing me on  
Through the storm, a new dawn shone  
Now my voice's finally free  
There's a fire, a song in me!

For the promise came alive  
Time has shown the will survives  
To the ones who said you'll fall  
Now they see the light will never die

Remember when it felt like all would disappear?  
But even darkness taught us how to persevere  
What once was failure turned into the guide  
What once was burden became a hope alive

The shadow never faded  
It carries purpose deep  
It only needs a heart  
That dares to still believe

And the strength kept pushing me on  
Through the storm, a new dawn shone  
Now my voice's finally free  
There's a fire, a song in me!  
For the promise came alive  
Time has shown the will survives  
To the ones who said you'll fall  
Now they see the light will never die

[Final] Em C Am Bm Em
