

## Gabriel Vendramini - What Moves Me On

```
Tom: E
                                                           As far as I wanna go, I?ll take my strings and fly
Intro: - Gb
             F
                                                           I bear the much that I can take
I don?t wanna stop the world
   A Gb E B A
                                                           Not sure if I?m about to break
I just wanna make it mine
                                                           You?ll hear the noise that I make right here
        E B
I?m not hanging on a cliff
                                                                            В
                                                           ?Cause that?s what moves me on
          Gb E B A
I?m climbing to the edge
                                                           That?s what moves me on
The steps heading to the top
                                                           Gb A B
          Gb
                E B A
                                                           What moves me on
May seem so oddly confused
                                                           Gb A B
                                                           What moves me on
           E
There?s surely a lot to win
                                                           Gh A B
         A Gb E B A
                                                           What moves me on
And there?s surely a lot to lose
                                                           Gb A B
                                                           What moves me on!
I bear the much that I can take
                                                           I bear the much that I can take \,
Not sure if I?m about to break
                          Gb
                                                           Not sure if I?m about to break
You?ll hear the noise that I make right here
                                                           You?ll hear the noise that I make right here
                В
?Cause that?s what moves me on
                                                                           В
                                                           ?Cause that?s what moves me on
                                                           Gb A B
         F B
                                 Gb
                           Α
                                                           What moves me on
A puzzle inside my head that?s always changing forms
                                                           Gb A B
                  В
                                                           What moves me on!
                                                           Gb A B
                                                           Yeah!
With pieces that makes no sense I?m creating a bigger picture
Gb E B A Gb E B A I?m trying my super skills but they don?t seem to work
                                                           Final - F#
```
