Gene Clark - Full Circle Song

```
                            Tom:
Intro:  D  Am  C  G

G                           D
Funny how the circle turns around
          Am C              G
First you're up, and then you're down again
                              D
Though the circle takes what it may give
          Am    C        G
Each time around it makes it live again

C                          Am
Funny how the circle is a wheel
        F    G            C
And it can steal someone who is a friend
                          Am
Funny how the circle takes you flying
            F   G             C
And if it's it right it brings it back again

G                           D
Funny how the circle turns around
                Am  C            G
You think you're lost and then you're found again
```

```
                                       D
And though you always look for what you know
            Am    C                 G
Each time around there's something new again

C                          Am
Funny how the circle is a wheel
        F    G            C
And it can steal someone who is a friend
                          Am
Funny how the circle takes you flying
            F   G             C
And if it's it right it brings it back again

( G   D   Am   C )
( G   D   Am   C   G )

C                          Am
Funny how the circle is a wheel
        F    G            C
And it can steal someone who is a friend
                          Am
Funny how the circle takes you flying
            F   G             C
And if it's it right it brings it back again
```
