

Giulia Araujo - Her

```
Like old times, baby
                            tom:
Intro: Gbm A B
                                                                 Come with me to see the show
        Gbm A B
                                                                               В
                                                                       Do you wanna see the show?
                                                                       B
Do you wanna see the show?
                             how'm I going to write this song?
  Inspiration won't come,
 She likes the same musical style as you
                                                                   She knows songs that I'll never know
 Oh God, what I'm gonna do?
                                                                A
My heart, my head's about to blow
I don't like this, could you turn off the sound?
                                                                  The way she looks at you don't deceive me
I'm not a rocker girl, you get my head spinnin' round and
                                                                  Yeah, it just kills me
round
      You get my head spinnin' round and round
                                                                 Now everything is calm but my mind is loud
     You get my head spinnin' round and round
                                                                 Just thinking of the day that you will let me down
                                                                       Thinking of the day you'll let me down
   One day, she will be older
                                                                       Waiting for the day you'll let me down
 One day, our hearts may be colder
   A
The truth will come outside, these kind of feelings are
                                                              B [Final] Gbm Dbm A Dbm
                                                                         Gbm Dbm A Dbm
very hard to hide
                                                                         {\sf Gbm} \quad {\sf Dbm} \quad {\sf A} \quad {\sf Dbm}
                                                                         Gbm Dbm A G Gbm
She tells you what she feels, she couldn't say it before
```
