

## **Gorillaz - Rhinestone Eyes**

```
Yet clinging to the atoms of rock
                         tom:
                                                                            A Am
                                                        Seasons see adjustment, signs of change
              Bbm (forma dos acordes no tom de Am )
Capostraste na 1ª casa
                                                        I can't see now, she said, "Taxi"
          [Primeira Parte]
                                                                        Am
                                                        Now that light is so I can see
                                                                           Am
                                                        This storm brings strange loyalties and skies
I'm a scary gargoyle on a tower
                    G Am
                                                            Am
                                                                         G Am
That you made with plastic power
                                                        I'm a scary gargoyle on a tower
                 G Am
                                                        That you made with plastic power
Your rhinestone eyes are like factories far away
                                                                            G Am
When the paralytic dreams that we all seem to keep
                                                        Your rhinestone eyes are like factories far away
                                                        (Here we go again)
                  G Am
Drive on engines 'til they weep
                                                        ( Dm Am Dm Am )
         G Am
                                Am A Em
                                                        (Em Am Em Am)
With future pixels in factories far away
                                                        ( Dm Am Dm Am )
         Am
                    G Am
                                                        (Em Am Em Am)
So call the mainland from the beach
                                                        [Terceira Parte]
       Am G Am
Your heart is now washed up in bleach
                                                        Helicopters fly over the beach
The waves are rising for this time of year
                       G
                                                                 Α
And nobody knows what to do with the heat
                                                        Same time every day, same routine
          G
Under sunshine pylons we'll meet
                                                        clear target in summer, when skies are blue
  Am
             G
                         Α
                                                           A Am A Am
While rain is falling like rhinestones from the sky
                                                        It's part of the noise when winter comes
                                                             A Am
                                                        It reverberates in my lungs
( Dm Am Dm Am )
(Em Am Em Am)
                                                             G Am
( Dm Am Dm Am )
                                                        Nature's corrupted in factories far away
(Em Am Em Am)
                                                        (Here we go again)
[Segunda Parte]
                                                        ( Dm Am Dm Am )
                                                        (Em Am Em Am)
                                                        ( Dm Am Dm Am )
I got a feeling now my heart is frozen
                                                        (Em Am Em Am)
      Α
All the verses and the corrosion
                                                        Your love's like rhinestones falling from the sky
       A Am A
                                                        With future pixels in factories far away
Have been obstinate in my soul
                                                        Your love's like rhinestones falling from the sky
  Am
                                                        With future pixels in factories far away
            Α
I prayed on the immovable
                                                        (Here we go again)
```
