

Gotye - Save Me

```
{\sf Bm} (forma dos acordes no tom de {\sf Am} )
Capostraste na 2ª casa
                                                             In the morning
Intro: E D E D E D A D
                                                                  D
                                                             You were leaving A D
In the mornings
                                                             Travelling south again
                                                                                         D A D
   D
I was anxious
                                                             And you said you were not unprepared
                                                                   E
It's better just to stay in bed

E
D
A
D
                                                             And all the dead ends
                                                                   D
Didn't want to fail myself again
                                                             And disappointments
                                                            Were fading from your memory

E

D A D
Running through all the options
                                                             Ready for that lonely life to end
       D
And the endings
Were rolling out in front of me
                                                             And you gave me love D
                                                             When I could not love myself
But I couldn't choose a thread to begin
                                                                  D A
      D
                                                             And you made me turn
And I could not love
                                                                  D E
                                                             From the way I saw myself
     D
Coz I could not love myself
                                                             And you're patient, love D E
   D A
Never good enough, no \frac{D}{}
                                                            And you help me help myself
That was all I'd tell myself
                                                             And you save me
    D A
And I was not well
                                                             And you save me
But I could not help myself D A D E D
                                                              D E
               A DEDE D
                                                             Yeah you save me
