

Grace VanderWaal - Light The Sky

Tom: C

Stars, they got nothing on us
 I don't think you understand
 Let's go out and do
 Something we'd never do
 Cause I feel like I can do
 Anything when
 My head is spinning
 And my feet are off the ground
 When I can't stop dancing
 Like no one's around
 And yeah, I think we were born to shine
 Cause' the stars are dull when their
 Compared to you and I
 And if people dont like it
 Then they can close their eyes
 'Cause we're not the same
 And we don't have to try
 We're brighter than fireflies

We're gonna light the sky

Oh, oh, oh (X2)
 Light the sky

You and me
 Me and you
 We will shine through
 You and me
 Me and you
 We will shine

Cause' the stars are dull when their
 Compared to you and I
 And if people dont like it
 Then they can close their eyes

'Cause we're not the same
 And we don't have to try
 We're brighter than fireflies
 We're gonna light the sky

Oh, oh, oh
 Light the sky
