       Em
Where you held me, grabbed my arm
                                                             [Ponte]

What a mental fire alarm
     Em D
'Cause a lot of that felt wrong
                                                             We could meet down the line
                                                                            D
Like I miss you
                                                             After all of the time and
                D
      Em
When I kissed you back I lied
                                                             Give an actual try
I can't promise you'll like it
     Em D C
                                                             I know I changed overnight
Had to fake the longest time
[Refrão]
                                                             So I can't blame you for fighting
                                                             And I'd be losing my mind
Where do we go now?
                                                             If you lived in your writing
Where do we go now?
                                                             'Cause now I'm half of myself here without
Where do we go now?
                                                             You
Where do we go now?
                                                             You're the best in my life and I lost you
                                                             Fm
                                                             And we had no control when it fell
Where do we go now?
                                                             Through
Where do we go now?
                                                             It was one-sided, hate how I hurt you
            D
Where do we go now?
                                                             If I could I'd have changed every feeling
Where do we go now?
                                                             Reservations were up to the ceiling
[Segunda Parte]
                                                             Guess the space was the thing that I
                                                             Needed
You look hopeful
                                                             But I miss you
         Em
Like we're supposed to work somehow
                                                             [Refrão]
      Em D
Can't you tell our light burnt out
     Em D C
Got a lot to cry about
                                                             Where do we go now?
                                                             Where do we go now?
There's nothing left here
      Em D
All our best years are behind
                                                             Where do we go now?

      Em
               D C
But you choose it every time
                                                             Where do we go now?
                                                             Where do we go now?

                                                             Where do we go now?
So, where do we go now?
