A                  D
So won't you stay and count the circles 'round my eyes?
A                      D             E
And we can watch the stars until the sun begins to rise

Gbm       D            A           E
I gotta know if you're the one that got away
Gbm       D           A        E
Even though it was never meant to be

A         E     A D
Say you'll stay the night
E                         A
'Cause we're running out of time
    E    A D
So stay the night
