

## **H.E.A.T - In And Out Of Trouble**

```
I'm just another memory
                           tom:
                                                                Running in and out of trouble
 I even know some things will never change
                                                                Going down going under yeah
 with or without you
                                                                Running in and out of trouble
 Broken every promise every chain
                                                                Hit me hard make it double yeah
       F
              F
 I have ever been tighter
                                                                Running in and out of trouble
 I'm just another failure in my life
 I got to fight just to stay alive
                                                                Going down going under yeah
 I'm just another hole to fill inside
                                                                Running in and out of trouble
 Somewhere on the way I just got lost
                                                                Hit me hard make it double yeah
 Guess when I lost you
                                                                Running in and out of trouble
                         D
 Kept staying between the lines that I have crossed
                   E D
                                                                Hit me make it double
 Yeah collisions will cost you
                                                                       D
                                                                Running in and out of trouble for the rest of my life
 Who will be my accident tonight
                                                                Running in and out of trouble
(continua tocando o Gbm )
 I got to fight just to stay alive
                                                                Hit me hard make it double yea
 I'm just another memory
                                                               ( Dbm D E Gbm )
                                                                ( Dbm D E Gbm )
                                                                ( Dbm D E Gbm )
 Running in and out of trouble
                                                               ( Dbm D E Gbm )
                                                              [Solo] Dbm D E Gbm
                                                                     Dbm D E
Dbm D E
Dbm D E
 Going down going under yeah
 Running in and out of trouble
 Hit me hard make it double yeah
                                                                I'm just another memory
                                                                Running in and out of trouble
 Waking up with fire in my mind
                                                                Going down going under yeah
       Е
                                                                       Gbm
 With or without you
                                                                Running in and out of trouble
                                                                Hit me hard make it double yeah
 I wonder how you took it all this time
                                                               Gbm
                                                                Running in and out of trouble
                E
 Now you no longer have to
                                                                Hit me make it double
                                                                Running in and out of trouble for the rest of my life
 Who will be my accident tonight
                                                                       Gbm
                                                                Running in and out of trouble
(continua tocando o Gbm )
                                                                Hit me hard make it double yeah
 I got to fight just to stay alive
```

## **Acordes**
