

Holmes - Caught On Fire

Tom: G

The way you kept your stare just slayed me

I don't know why I had to turn away

I wish he didn't have to break it up but I kind of understand

I would have acted just the same

I think you know it won't be long

Before I twist my arm and reach away

I hope you meant it as I took it 'cause

I'm about to make a fool out of myself

At my expense

Molecules ignite, I'm caught on fire

Overwhelmed colliding atoms keep me from my sleep

Chemicals electric through the wire

Overloaded circuit buzzing you and me

Your move, your move, remove the cover

Strike another match and fan the flame

I say I don't know how to shake it off

But I think you know the truth

I wouldn't even if I could

Molecules ignite, I'm caught on fire

Overwhelmed colliding atoms keep me from my sleep

Chemicals electric through the wire

Overloaded circuit buzzing you and me

Caught on fire

Overwhelmed colliding atoms keep me from my sleep

Chemicals electric through the wire

Overloaded circuit buzzing you and me

You and me

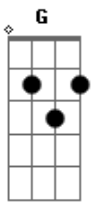

You and me on fire

The way you kept your stare just slayed me

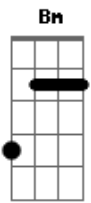

You and me

You and me, oh..
