

# Hozier - Better Love

tom:

Intro: Am

[Primeira Parte]

I once kneeled in shaking thrill  
I chase the memory of it still  
Of every chill  
Chided by that silence of a hush sublime  
Blind to the purpose of the brute divine  
But you were mine  
Staring in the blackness at some distant star  
The thrill of knowing how alone we are, u  
Nknown we are  
To the wild and to the both of us  
I confessed the longing I was dreaming of  
Some better love

[Refrão]

But there's no better love  
Beckons above me and there's no better love  
That ever has loved me  
There's no better love  
Darling, feel better love  
Feel better love

[Segunda Parte]

And I've never loved the darker blue  
Than the darkness I have known in you  
Own from you  
You, whose heart would sing of anarchy  
You would laugh at meanings, guarantees  
So beautifully  
When our truth is burned from history

By those who figured justice in fond memory  
Witness me  
Like fire weeping from a cedar tree  
Know that my love would burn with me  
We'll live eternally

[Refrão]

Cause there's no better love  
That beckons above me, there's no better love  
That ever has loved me, there's no better love  
So darling, feel better love  
Cause there's no better love  
That's laid beside me, there's no better love  
That justifies me, there's no better love  
So darling, darling, feel better love  
Feel better love

[Ponte]

Feel better love  
Feel better love  
Feel better love

[Refrão Final]

Cause there's no better love  
That beckons above me, there's no better love  
That ever has loved me, there's no better love  
So darling, feel better love  
Cause there's no better love  
That's laid beside me, there's no better love  
That justifies me, there's no better love  
So darling, darling, feel better love  
Feel better love
