Imaginary Future - Fire Escape

Tom: G
Intro: 2x: G C D
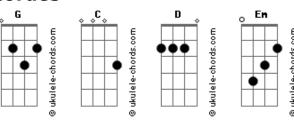

```
            G
There's a fire escape
       C                      D
At the end of the gate where I am standing
             G
There's a ladder that goes
      C                    D
To a safe place below on the ground

              G
But I don't need it now
            C                 D
It's too soon to go down to the bottom
             G
I will wait 'til it's close
                 C
When I'm needing it most
            D
When I'm scared
```

(Bridge)

```
         Em                 C       D
I will look out into the starred sky
           Em               C     D
With your help now, I will be all right
```

(Chorus)

```
G                    C
Oh, my future, I can't believe it's time
G                   D
No, my lover, I'll never leave you behind
G                    C
Oh, my future, I can't believe it's time
G                   D
No, my lover, I'll never leave you behind
```

(G C D)

```
                    G
There's a pattern of stones
           C                   D
Laying out in a row by the river
               G
We have started to climb
           C                     D
With a hand on the side of the wall

               G
But I'm too stunned to call
          C                D
And hoping it all will be over
               G
With the radio on
                  C
With the waterfall gone
      D
We will go
```

(Bridge)

```
         Em                 C       D
I will look out into the starred sky
           Em               C     D
With your help now, I will be all right
```

(Chorus)

```
G                    C
Oh, my future, I can't believe it's time
G                   D
No, my lover, I'll never leave you behind
G                    C
Oh, my future, I can't believe it's time
G                   D                      G
No, my lover, I'll never leave you behind
```
