

Imagine Dragons - Demons

```
Tom: C
                                                                At the mess you made
   (pra tocar no tom original usar um capo na 3ª casa)
                                                                    Don?t want to let you down
Primeira Parte:
                                                                    But I am hell bound
When the days are cold
                                                                    Though this is all for you
                                                                     Don?t want to hide the truth
And the cards all fold
And the saints we see
                                                                    No matter what we breed
Are all made of gold
                                                                    We still are made of greed
                                                                    This is my kingdom come
When your dreams all fail
                                                                     This is my kingdom come
And the ones we hail
                                                                Refrão:
Are the worst of all
And the blood?s run stale
                                                                  When you feel my heat
                                                                  Look into my eyes
    I want to hide the truth
                                                                   It?s where my demons hide
    I want to shelter you
                                                                  It?s where my demons hide
    But with the beast inside
                                                                  Don?t get too close
    There?s nowhere we can hide
                                                                  It?s dark inside
    No matter what we breed
                                                                   It?s where my demons hide
    We still are made of greed
                                                                  It?s where my demons hide
    This is my kingdom come
                                                                Terceira Parte:
    This is my kingdom come
                                                                  They say it's what you make
Refrão:
                                                                  I say it's up to fate
  When you feel my heat
                                                                   It's woven in my soul
                                                                  I need to let you go
  Look into my eyes
  It?s where my demons hide
                                                                  Your eyes, they shine so bright
 It?s where my demons hide
                                                                  I want to save that light
 Don?t get too close
                                                                   I can't escape this now
 It?s dark inside
                                                                  Unless you show me how
  It?s where my demons hide
                                                                Refrão:
 It?s where my demons hide
                                                                  When you feel my heat
Segunda Parte:
                                                                  Look into my eyes
At the curtain?s call
                                                                   It?s where my demons hide
It?s the last of all
                                                                  It?s where my demons hide
When the lights fade out
                                                                  Don?t get too close
All the sinners crawl
                                                                  It?s dark inside
So they dug your grave
                                                                   It?s where my demons hide
                                                                  It?s where my demons hide
And the masquerade
Will come calling out
                                                                Dedilhado:
