

Imagine Dragons - Demons

```
tom:
                                                                    But I am hell bound
        (pra tocar no tom original usar um capo na 3ª casa)
                                                                     Though this is all for you
Primeira Parte:
                                                                     Don?t want to hide the truth
When the days are cold
                                                                    No matter what we breed
And the cards all fold
                                                                    We still are made of greed
And the saints we see
                                                                    This is my kingdom come
Are all made of gold
                                                                     This is my kingdom come
                                                                Refrão:
When your dreams all fail
And the ones we hail
                                                                  When you feel my heat
Are the worst of all
                                                                  Look into my eyes
And the blood?s run stale
                                                                   It?s where my demons hide
                                                                  It?s where my demons hide
    I want to hide the truth
                                                                  Don?t get too close
    I want to shelter you
                                                                  It?s dark inside
    But with the beast inside
                                                                   It?s where my demons hide
    There?s nowhere we can hide
                                                                  It?s where my demons hide
    No matter what we breed
                                                                Terceira Parte:
    We still are made of greed
                                                                  They say it's what you make
    This is my kingdom come
                                                                  I say it's up to fate
    This is my kingdom come
                                                                   It's woven in my soul
Refrão:
                                                                  I need to let you go
  When you feel my heat
                                                                  Your eyes, they shine so bright
  Look into my eyes
                                                                  I want to save that light
  It?s where my demons hide
                                                                   I can't escape this now
  It?s where my demons hide
                                                                  Unless you show me how
  Don?t get too close
                                                                Refrão:
  It?s dark inside
                                                                  When you feel my heat
  It?s where my demons hide
                                                                  Look into my eyes
 It?s where my demons hide
                                                                   It?s where my demons hide
Segunda Parte:
                                                                  It?s where my demons hide
At the curtain?s call
                                                                  Don?t get too close
It?s the last of all
                                                                  It?s dark inside
                                                                   It?s where my demons hide
When the lights fade out
All the sinners crawl
                                                                  It?s where my demons hide
So they dug your grave
                                                                Dedilhado:
And the masquerade
Will come calling out
```

Don?t want to let you down
