Imagine Dragons - Symphony

```
                              tom:
                       G
Intro:  G   C

                       G
Ever since I was young
                    G
Coming up, coming up
                    G
Always marching to a drum
                    G
Bra-da-dum, Bra-da-dum
                C
Always focused on me
               C
One one, one one
                          C
Now I wish that I could hold someone, someone

                       G
So tell my mom, I love her
               G
Call my baby sister
                    G
Should've hugged and kissed her
                    G
Cause life is just a mystery
        C
And it's gone before you know it
            C
So if you love me, won't you show it?

G
  Cause this life is one big symphony
G                                      C
  This night is one for you and me
                            C
I'm the strings and you're the timpani
                       D        G
You're my constant tambourine
G
 This life is one big symphony
G                          C
So glad I got you next to me
                            C
I'm the chords and you're the melody
                   D        G
This life's one big symphony

                   G
She was the piano, I'm the xylophone
                 G                 C
You can have the trumpet, I'm the saxophone
                    G
Life's a skipping rope
                    G
Keep going, keep going
                    G
Find a silence in the note
                    G
Dote, dote, dote, dote
                       C
Had to struggle when I was broke
            C
So low, so low
                   C
Writing music just to cope
                   C
No hope, no hope
```

Acordes

```
                              G
Yeah, life is just perspective
                         G
Laughing when you've wrecked it
                         G
Smiling when you kept it together

You weathered the storm
                 C
At the end of the play
                 C
You sang all the way
C
Doesn't matter how off-key
            D
If you did it, your way

G
  Cause this life is one big symphony
G                                      C
  This night is one for you and me
                            C
I'm the strings and you're the timpani
                       D        G
You're my constant tambourine
G
 This life is one big symphony
G                          C
So glad I got you next to me
                            C
I'm the chords and you're the melody
                   D        G
This life's one big symphony

G
 Would you care if I played you the flute?
         G                                         C
See, it's my favorite one because it's so delicate and
beautiful
                      C                    D
I pull out the trombone if it is more suitable
G
 Wanna make you smile
                      G
It's been a little while since I've seen the white of your
teeth
               C
Been a hard year, lucky the guitar's here

[Solo]  G   C   D   G   C

C                         D      G
Life is just one big symphony
G
 This life is one big symphony
G                               C
 This night is one for you and me
                            C
I'm the strings and you're the timpani
                       D        G
You're my constant tambourine
G
 This life is one big symphony
G                          C
So glad I got you next to me
                            C
I'm the chords and you're the melody
                   D
This life's one big symphony
```
