Iron Maiden - Coming Home

Tom: G

```
   Em                                G
Am
        When I stand before you shining in the early morning
sun
                                    C
Em
        When I feel the engines roar and I think of what we've
done
                                G
Am
        Oh the bittersweet reflection as we kiss the earth
goodbye
                                    C
        As the waves and echoes of the towns become the ghosts
of time

D                           Em
        Over borders that divide the earthbound tribes
            D                           Em
        No creed and no religion just a hundred winged souls
              D                         Em
        We will ride this thunderbird, silver shadows on the
earth
                    D                       ( Am B C B Am G
Gbm Em )
A thousand leagues away, our land of birth

C          D        Em
        To Albion's land

Refrão:
          G           C              Em
     Coming home when I see the runway lights
           C              Em              D ( Am B C )
     In the misty dawn the night is fading fast
           Em          G           C            Em
     Coming home, far away as their vapor trails align
                  C                  Em                 D C
      Where I've been tonight, you know I will not stay
Em                          G                            Am
    Curving on the edge of daylight til it slips into the void
                          C                                Em
    Waited in the long night, dreaming til the sun is born
again
                               G
Am
    Stretched the fingers of my hand, covered countries with
my span
                           C
    Just a lonely satellite, speck of dust and cosmic sand

D                          Em
        Over borders that divide the earthbound tribes
             D                                  Em
        Through the dark Atlantic, over mounting stormy waves
              D                             Em
        We will ride this thunderbird, silver shadows on the
earth
                    D                          ( Am B C B Am G
Gbm Em )
A thousand leagues away, our land of birth

C          D        Em
     To Albion's land

Refrão:
          G           C              Em
     Coming home when I see the runway lights
           C              Em              D ( Am B C )
     In the misty dawn the night is fading fast
           Em          G           C            Em
     Coming home, far away as their vapor trails align
                  C                  Em                 D C
     Where I've been tonight, you know I will not stay
```
