

## Jack Johnson - Breakdown

```
Tom: C
                                                                I, need this here
I hope this old train breaks down
                                                                Old train to breakdown
Then i could take a walk around
                                                                Oh, please just
And, see what there is to see
                                                                Let me please breakdown
And time is just a melody
                                                                I wanna break on down
All the people in the street
                                                                But i can't stop now
Walk as fast as their feet can take them
                                                                Let me break on down
I just roam through town
                                                                But you cant stop nothing
                                                                If you got no control
And though my windows got a view
                                                                Of the thoughts in your mind
The frame im looking through
Seems to have no concern for me now
                                                                That you kept in, you know
So for now
                                                                You dont know nothing
                                                                But you dont need to know
Refrão:
I need this
                                                                The wisdoms in the trees
Old train to breakdown
                                                               Not the glass windows
C Em
Oh, please just
                                                                You cant stop wishing
Let me please breakdown
                                                                If you dont let go
                                                                But things that you find
This engine screams out loud
                                                               And you lose, and you know
Sayin the beat gonna crawl westbound
                                                                You keep on rolling
So i dont even make a sound
                                                                Put the moment on hold
Cause its gunna sting me when i leave this town
                                                                The frames too bright
All the people in the street
                                                                So put the blinds down low
That i'll never get to meet
                                                                  Fm
If these tracks dont bend somehow
                                                                I need this
And i got no time
                                                                Old train to breakdown
                                                                  Em
That i got to get to
                                                                Oh, please just
Where i dont need to be
                                                                Let me please breakdown
                                                                C Em
So i
                                                                I, need this
C Em
                                                                Old train to breakdown
I need this
                                                                Oh, please just
Old train to breakdown
                                                                Let me please breakdown
Oh, please just
                                                                I wanna break on down
Let me please breakdown
                                                                But i can't stop now
```
