

## Jack Johnson - Hope

```
You better hope you?re not alone
  Toque o violão no ritmo do teclado durante a musica
                                                               You better hope you?re not alone
    riff 1
                       riff 2
                                            riff 3
                                                               You better be hoping you?re not so...
                                                                        G
                                                               Du du rut
esses riffs aparecem durante a musica toda.
Intro: RIFF 1, RIFF 2 e RIFF 3
                                                               Am
      (G Am G Am )
                                                               Hope...
                                                               G G Am
Verse 1:
                                                               Hmm hmm humm
  Your shadow walks faster than you
                                                               Verse 3:
You don?t really know what to do
                                                               Your - Your echo comes back out of tune
Do you think that you?re not alone?
                                                               Now you can't quite get used to
                                                               Reverb is just a room
You really think that you are immune to
Its gonna get that the best of you
                                                               The problem is that there?s no truth
Its gonna lift you up and let you down
                                                               Its fading way too soon
                                                               The shadow is on the move
Bridge :
It will defeat you then teach you to get back up
                                                               And maybe you should be moving too
After it takes away all that
You learn to love
                                                               It will defeat you then teach you to get back up
Verse 2:
                                                               After it takes away all that
Your reflection is a blur, out of focus
                                                               You learn to love
                                                                    G
                                                               'Cause you don?t, always
But in confusion the frames are suddenly burnt
And in the end of a roll of illusion
                                                               Have to hold to your head
a ghost waiting its turn
                                                               Higher than your heart
Now I see can right through
                                                               Chorus:
It?s a warning that nobody heard
                                                               You better hope you?re not alone
                                                               You better hope you?re not alone
Bridge :
It will defeat you then teach you to get back up
                                                               You better hope you?re not alone
After it takes away all that
                                                               You better be hoping you?re not alone
You learn to love
                                                               You better hope you?re not alone
'Cause you don?t, always
                                                               You better hope you?re not alone
                                                               You better hope you?re not alone
Have to hold to your head
                                                               You better be hoping you?re not so...
Higher than your heart
                                                               G G
Chorus:
                                                               Du ru ru ru ru
You better hope you?re not alone
                                                               Better hooope
You better hope you?re not alone
                                                               Huuu huuu hmmm
You better hope you?re not alone
                                                               (Hope you?re not alone)
                                                               Huuu huuu hmmm
You better be hoping you?re not alone
You better hope you?re not alone
                                                               Hooope, Hoope...
```
