# Jack Johnson - Is One Moon Enough

Tom: D
Intro: D

[Primeira Parte]

```
D
Is one moon enough
D
If I can see
            G
With my cheap telescope?
E           G
Bet my neighbor has two or three
D
Down soon enough
D
What does it mean
G
If every time I look up
G
I see them
E                 G
Laughing down on me?
```
[Refrão]

```
A           G                 D     D
Take that moon or break across the sea
A           G                 D     D
Everything I want's just out of reach
```

[Segunda Parte]

```
D
Is one moon enough
D
Well, it used to be
G
When I could see with my own naked eye
E                 G
She was smiling down on me
```

```
D
Is one ever enough?
D
How could it ever be if my neighbor has more than me
G
And my moon
E             G
Just out of reach
```

[Refrão]

```
A           G                       D     D
Take that moon or break across the sea
A           G                 D     D
Everything I want is further from me
D           D       D
Hmm, hmm, hmm
```

```
D
Moon down soon enough
D
Now I can see a million moons that think of
G
Me and my moons
E                 G
Always following me
```

[Terceira Parte]

```
A           G                   D     D
Take that moon or break across the sea
A           G                 D       D
Everything I want is just out of reach (hmm, hmm)
A           G                 D     D
Why's that moon always following me? (hmm, hmm)
A           G                 D       D
Everything I want's just out of reach (hmm, hmm)
D           D       D
Hmm, hmm, hmm
```
