

Jack Johnson - Upside Down

```
Well I can try
               tom:
Intro: E Gbm E Gbm
                                                              And as I roll along I begin to find
                                                              Things aren't always just what they seem
                                                              [Refrão]
[Primeira Parte]
                                                             I want to turn the whole thing upside down
Who's to say what's impossible
                                                               I'll find the things
                                                                           E
                                                              They say just can't be found
Well they forgot this world
Keeps spinning and with each new day
                                                               I'll share this love
                                                                    E Gbm
                      Gbm
                                                              I find with everyone
I can feel a change in everything
                                                              We'll sing and dance
E Gbm
And as the surface breaks reflections fade
                       Gbm
                                                              To mother na_ture's songs
But in some ways they remain the same
                                                              [Terceira Parte]
And as my mind begins to spread it's wings
                                                              This world keeps spinning
There's no stopping curiosity
                                                                        Abm
                                                              And there's no time to waste
[Refrão]
                                                              Well it all keeps spinning spinning
I want to turn the whole thing upside down
                                                              Round and round and
 I'll find the things
           E Gbm
                                                              [Refrão Final]
They say just can't be found
 I'll share this love
                                                              Upside down
         E Gbm
I find with everyone
                                                               Who's to say what's impossible
                                                                 E Gbm
 We'll sing and dance
                                                              And can't be found
         E Gbm
                                                               I don't want this feeling to go away
To mother na_ture's songs
I don't want this feeling to go away
                                                              [Final]
[Interlúdio] E Gbm E Gbm
                                                              (E Gbm)
[Segunda Parte]
                                                              Please don't go away
Who's to say I can't do everything
                                                              Is this how it's supposed to be?
Acordes
                                                          Abn
```
