

Jake Bugg - Swept Away

```
You're like the rush in time,
Intro: Dm C Bb A
                                                                             Bb
                                                              Sharp of the hardest drain,
You got me were you want, I've placed you in the stars,
                                                              But I stay, swept away.
                   Bb
Fell for all your charms, too much to pass.
                                                              Just like the hurricane,
              Dm
There's another sign, a darkness to your sigh.
                                                              Blows away the good,
Hard to understand, that fall come as one.
                                                              Day by day, swept away.
CHORUS:
                Bb
                                                              But I know what I got, I got just what I want.
You're like the rush in time,
                                                                                Bb
          Bb
                                                              Too much of everything, sometimes not enough.
Sharp of the hardest drain,
                                                              CHORUS:
    C
But I stay, swept away.
                                                                              Bh
                                                              You're like the rush in time,
                                                                            Bb
When you're good you're good, when you're bad you're wrong,
                                                              Sharp of the hardest drain,
                Bb
Drinking all the wine, singing all the songs.
                                                              But I stay, swept away.
                Dm
There's another sign, sweetest that I know,
                                                              Just like the hurricane,
            Bb
Hard to understand, where the person goes.
                                                              Blows away the good,
                                                                   C
CHORUS:
                                                              Day by day, swept away.
