James Arthur - Remember Who I Was

```
Tom: C
Intro: C  Fm  C  Fm

C                          Fm
I know I hurt you, I was so unkind
C                     Fm
I was ungrateful, I wasted your time
      Am            G
But I was young and lost, so lost
        C                                Fm
See, you took this poor boy and changed his whole life
     C                         Fm
Granted his wishes and dreams overnight
       Am           G
And I saw stars, they shot me down
       Em                  Fm
But I deserved it, they knocked me out

     C                      Am                  C
I'm just waking up now, in the tears of the one's I love
                       Fm
It's quiet, I'll bet that everybody thinks I'm done
   C                          Am              Em
I need to get up now, I've been down here for too long
                            Fm
Two years I've been lost, now I remember who I was
C     Fm   C     Fm
Who I was, who I was
```
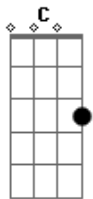

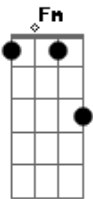

```
C                          Fm
I am the one who beat me black and blue
   C                       Fm
No one can hurt all your feelings like you
        Am          G
Whoa, I know it, or validate
          C                       Fm
See, if you're a misfit and feel out of place
C                        Fm
Or you don't like how you look, it's okay
            Am                    G
'Cause someone will, but you need to love yourself
     Em                  Fm
Don't end up like me, don't end up like me

     C                      Am                  C
I'm just waking up now, in the tears of the one's I love
                       Fm
It's quiet, I'll bet that everybody thinks I'm done
   C                          Am              Em
I need to get up now, I've been down here for too long
                            Fm
Two years I've been lost, now I remember who I was
C     Fm   C     Fm
Who I was, who I was

[Final] C  Fm  C  Fm
