James Bay - Rescue

Tom: G

```
                  Gbm            A
I found you all alone
 D            A
I came to warm your bones
           D          A                E
There were twenty million tears in your hands
   Gbm         A
You found me in the dark
      D           A
You came to heal my scars
D          A                  E
I was slipping, sinking through the sand

 Gbm        A                D            A
  They say the more you love the harder you fall
Gbm       A                 D          A
  But I would rather hurt than nothing at all
Gbm              A                     D   A
  Through the good,  through the bad, through the lonely
        Bm                D
I always rescue you, you always rescue me

    Gbm       A
We never draw the line
   D          A
But only 'cause you're mine
D          A                  E
Only 'cause you promise me I'm yours
      Gbm        A
You made me fall apart
    D        A
My song to get to her
   D                A                    E
Is there though when you're walking through the door
        Bm      D    A
You know you keep me alive, oh
```
