James Bay - When We Were On Fire

Tom: Bb

```
    Gm
Drifting apart getting harder to hold you
Days getting dark and the nights are growing cold
       Eb             F
Are we burning out?
Gm
Swept out of sight, rolling out on an ocean
Let's cut all the ropes and get lost in the moment
    Eb                                   F
If our hearts are alive, maybe then they might
Send us back to the sun

       Eb          Bb
Now I know, I know
          D                 Gm
That we're losing light, our love is dying
 Eb                  Bb
Out cold on the floor
      D              Gm
Like a fallen star that shines no more
Eb           Bb    Cm                  Gm
Take, take-a-me back to where we was before
                       Eb    Bb
When we were on fire,
Cm Gm
fire

Gm
Head down heading under ground feeling wasted
Cold to the bone so alone I can taste it
 Eb        F
Let's light it up
Gm
The streets are alive now and everything's racing
                             Eb          F
```

```
You're on my mind running in my veins, fueling the flame
Let's start it again
        Eb          Bb
And I know, I know
          D                 Gm
That we're losing light, our love is dying
 Eb                  Bb
Out cold on the floor
      D              Gm
Like a fallen star that shines no more
Eb           Bb    Cm                  Gm
Take, take-a-me back to where we was before
                       Eb    Bb
When we were on fire,
Cm Gm
fire

Oh oh oh
Now, don't tell me, no, that we're burning down
Oh oh oh
Now, don't tell me, no, that we're burning now

        Eb          Bb
Now I know, I know
          D                 Gm
That we're losing light, our love is dying
 Eb                  Bb
Out cold on the floor
      D              Gm
Like a fallen star that shines no more
Eb           Bb    Cm                  Gm
Take, take-a-me back to where we was before
                       Eb    Bb
When we were on fire,
Cm Gm
fire
```
