

James Blunt - Bartender

```
Tom: E
                                                               Because we both know it was me who got it wrong
 (forma dos acordes no tom de D )
                                                               But fuck it's good to see you
Capostraste na 2ª casa
It's a little after midnight
                                                               You look awesome and I miss you
                                                                                                                          Fm
                                                               Baby listen now, they're playing our song
There's a couple in the corner
              Ε
                                                               We can dance but I can't dance
And I wonder what he said because she's crying
And I guess they won't remember
                                                               Maybe we can stick to holding hands
                                                                                                            F
When they wake up in the morning
                                                               And let's raise a glass
                                                               And forget the past
With the headache from the whiskey and the wine
I know that I have said things I regret when I am sober
                                                               If we keep on drinking we're gon' fall back in love
                                                                            D A
                                                                                     E Fm
                                                               So fill it up, fill it up
'Cause we always hurt the ones we love the most
I messed up and I know it if I hurt you girl I'm sorry
                                                               We must not be thinking 'cause we can't get enough
                                                               So fill it up, fill it up
But it's good to see the girl I used to know
                                                                                                                      DAE
                                                               Bartender, can you pour some love?
We can dance but I can't dance
                                                                                                                  DAE
                                                               Bartender, can you pour some love?
Maybe we can stick to holding hands
                                                                                                                Fm
                                                               And it's closing time, back to yours or mine?
Or should we raise a glass
                                                               After all this time, you still blow my mind
And forget the past?
                                                               And it's closing time, back to yours or mine?
If we keep on drinking we're gon' fall back in love
                                                               After all this time, after all this time
                      E Fm
            D A
So fill it up, fill it up
                                                               If we keep on drinking we're gon' fall back in love
                                                                            D A
We must not be thinking 'cause we can't get enough
                                                               So fill it up, fill it up
            D A
So fill it up, fill it up
                                                       DAF
                                                               We must not be thinking 'cause we can't get enough
Bartender, can you pour some love?
                                                                             D A
                                                     D A E Fm
                                                               So fill it up, fill it up
Bartender, can you pour some love?
                                                                                                                      DAF
                                                               Bartender, can you pour some love?
                                                                                                                      DAF
We can talk about a future, we don't wanna reminisce
                                                               Bartender, can you pour some love?
