Jasmine Thompson - Let Myself Try

```
                        tom:
                G

       [Primeira Parte]

G              D                     C
I'm gonna find and I'm not coming back
G                D              C
And all the white lies that I don't understand
Bm         C          Bm              C        G
All of these walls, well, they're starting to fall
G          D                  C
I'm gonna try and I'm not gonna stop
G          D                        C
I'll give all I have and I'll take what I've got
Bm            C          Bm        C
And if all of my dreams fall apart at the seams

[Refrão]

C
I'm gonna let myself, let myself
G          D           C
Fall once or twice, I won't mind
C
I'm gonna let myself, let myself
Em       A          Em        A
Fail and discover 'cause one way or another
G           D             C
I'll be fine, it's alright in this life
C
I'm gonna let myself, let myself

[Segunda Parte]

G            D                 C
If I'm gonna love maybe I'm gonna lose
G            D                  C
If I'm gonna touch maybe I'm gonna bruise
Bm          C      Bm            C
```

```
'Cause all of these scars, they're all that we are

[Refrão]

C
I'm gonna let myself, let myself
G          D           C
Fall once or twice, I won't mind
C
I'm gonna let myself, let myself
Em       A          Em        A
Fail and discover 'cause one way or another
G           D             C
I'll be fine, it's alright in this life
C
I'm gonna let myself, let myself

[Ponte]

D        G                C
Who says perfect can't be little things, little things
D        G                C
I look at you and I see simplicity in front of me
D
And that's everything

[Refrão]

C
I'm gonna let myself, let myself
G          D           C
Fall once or twice, I won't mind
C
I'm gonna let myself, let myself
Em       A          Em        A
Fail and discover 'cause one way or another
G           D             C
I'll be fine, it's alright in this life
C                         G
I'm gonna let myself, let myself try
```
