Jeremy Zucker - End - Stripped

[Segunda Parte] tom: G What's wrong with the lights low Intro Just tell me what it is you're tryna say 'Cause in the end you'll understand [Primeira Parte] I'm already a world away And I see you haven't changed I should've seen this through But I knew how it could end [Pré-Refrão] I guess things don't change 'Cause this shit gets old With a heart of gold, you know If I need you I'll see you in my dreams I let feelings fade again But I've thrown it all Over waterfalls [Pré-Refrão] [Refrão] And I won't let go What I called a home unless It slipped right through I'm staring at the clouds You know I hate this weather But we can work it My fingers in the rain But I've thrown it all Over waterfalls Out I swear I could do better [Refrão] If you let me So we wait for things to I'm staring at the clouds You know I hate this weather Change But we can work it I never thought that this could end If I'm not with you Out I swear I could do better If you let me So we wait for things to How could I fall asleep again [Final] Change I never thought that this could end You know that I've been here times before And no one's watching If I'm not with you You won't ever know, that's right You won't ever save my life How could I fall asleep again You won't ever change my mind x2 x3
