

Jimmy Eat World - Invented

Tom: D
Intro: D G Em G

When I first came to see you
I called it Houston street
Could we meet? Show me all the things you see?
I'm one more here
Some old-timer pioneer
Who believes with shaken faith
I still have some cool

I could leave you here with your 'people'
If I'm a flag you'd not prefer to wave

You're always in my head
You're just what I wanted
I live in constant debt
To feel you, invented

When I first came to LA
I met you the old fashioned way
Too drunk
And even worse, much too lonely
I'll leave it there
A busted homesteader
Who believes in virgin grace
Somehow I'll stay proud

Any dick can roll up in a suit
But only I would know what really moves you

You're always in my head
You're just what I wanted
I live in constant debt
To feel you, invented

(D G D D)

There's a cinematic end
I picture it just right
Having trouble with the right words
But you tell me with your eyes
There's something good I've missed
Something I cant' find
Do you believe me now?
Can you see it in my eyes?
See it in my eyes?
See it in my eyes?
