I woke up this morning

I guess I was dreaming

?Bout that full moon

?Bout that full moon

You left our sheets mourning

Your love's always pleading

Through these full moons

Through these full moons

You had me

Like I was water on a desert

You held me

As if nothing else mattered

You asked me

If I would stay with you forever

We burned down our bed

As we watched that full moon

You said all those mellow words

You kissed me from head to toe

I should have known better

That this was only true

During that full moon

Once in a blue moon

Once in a blue moon

Once in a blue moon
