ok i use the tune (c) to do this song i am pretty sure that what john uses  
aswell  
its taken me a while to get this song note for note, so i expect it will  
take u awhile aswell, so just have the song playing in the background while  
ur learning it  
riff 1

riff 2

riff 3

riff 4

then a whole bunch of muteing  
use a tremolo style of finger picking for the next two stanzas

riff 5

these are just the frets not the timeing

riff 6

riff7

now it would take me days to do the timeing exact so i am just going to put  
the cords and u can work out the timeing

riff 8

now u do the same for each of the other cords simialir to the riff 7 as u  
descend just hit the high (e)

riff 9

then it goes off in a little decent solo i am not going to do it , but it  
goes down the finger board similair to riff 2 just before he starts to sing  
(dont even understand)

riff 10

riff11  
when this little mellowed bit comes when john says,(dont know why,dont even  
understand)the corus is muted and the higher pitch string are left to take  
over

just after the (dont understand ) part it goes decending down the finger  
board  
riff 12

INTERLUDE **E** JBT ,**NAT** **AND** **CARLO**  
riff 13

the nect little solo once the interlude is over is simialir to riff 3  
only it lingers around the 7th and 8th fret for about 4 beats the start the  
decent down the finger u get to the 2nd and first fret, the good  
solo starts  
riff 14

end of solo

please note that this is not exact and the timing is not exact ,so u need

to practice and listen to the song to get it exact  
peace out
