Tom: A

```
    (riffs - main guitar)

(intro/verses) A D Bm E A

         (x2)                        (x2)
```

```
(verse 1 - intro riff)

A
Young and full of running
           D
Tell me where's that taking me?
     Bm              E              A
Just a great figure 8 or a tiny infinity
A
Love is really nothing
      D
But a dream that keeps waking me
                          Bm
For all of my trying
                  E
You still end up dying
              A
How can it be?

(chorus) D A
        x4            x4
```

```
D                                               A
Don't say a word, just come over and lie here with me
D                                               A
'Cause I'm just about to set fire to everything I see
D                                               A
I want you so bad I'll go back on the things I believe
D                                               A
There I just said it, I'm scared you'll forget about me

(verse 2 - same riff of the intro)
```

```
A
So young and full of running,
          D
all the way to the edge of desire
              Bm                        E
Steady my breathing, silently screaming,
              A
"I have to have you now"
A
Wired and I'm tired
          D
Think I'll sleep in my clothes on the floor
              Bm                E
Maybe this mattress will spin on its axis
              A
and find me on yours

(chorus - also with riff)
D                                               A
Don't say a word, just come over and lie here with me
D                                               A
'Cause I'm just about to set fire to everything I see
D                                               A
I want you so bad I'll go back on the things I believe
D                                               A
There I just said it, I'm scared you'll forget about me
