C                      F
When are you gonna wise up, boy?
C                      F
When are you gonna wise up, boy?
C                      F
When are you gonna wise up, boy?
C                      F
When are you gonna wise up, boy?

C                      F
You're hiding in your mind
               C
working all the time
                           F
trying to make it better than you got it
       C                          F
And you've been spending all your time
                    C
searching for a sign
                       F
That's never going to look the way you wanted

C                    F
I think you better wise up, boy
C                    F
I think you better wise up, boy
C                    F
I think you better wise up, boy
C                    F
I think you better wise up, boy
