

Kalyio - Take what you can get

Tom: E

m [Intro] Em C G B

She's one of those girls; you just take what you get

Whatever sweet little morsels that just drip, drip, drip

She's the last one you call when your car doesn't start

But she lights up the party, when you need a little spark

She never has no money. It just runs down her neck

Never had a man that wouldn't have her back

You're not at all running, but you'll take what you get

Whatever sweet little morsels that just drip, drip, drip, drip, drip

Like morning

Drip drip drip drip drip

She stunning

Drip drip drip drip drip

You're near her

Drip drip drip drip drip

You know you'll take what you can (get)

The clever things she says, you could coin every phrase

Her body's so rocking, got your mind in a haze

It's one of those things, once you're caught in the net

Whatever sweet little morsels, you will take what you can get

You know you'll take what you can get

You know you'll take what you can (get)

On and on, on down the road

Take your moment in her glow

There's no one way to do it, there's no one way to win

But we already know you're gonna take what you can

On and on, on down the road

Take your moment in her glow

There's no one way to do it, there's no one way to win

But we already know you're gonna take what you can get

You know you'll take what you can get

You know you'll take what you can get

You know you'll take what you can get

You know you'll take what you can get
