                                                               See I'vebeen waiting all day
This is more than a typical kinda thing
                                                                For you to call me baby
Felt the joints in my bones where you were touching me, oh oh
                                                               So let's get up, let's get on it
                                                                           В
Didn't want to take it slow
                                                               Don't you leave me brokenhearted tonight
                                                                Come on, that's right
                                                               Honest baby I'll do
In the days, going crazed, I can barely think
                                                                            Dbm
You're replaying in my brain, find it hard to sleep, oh oh
                                                               Anything you want to
Waiting for my phone to blow
                                                                So can we finish what we started
                                                                          В
                                                               Don't you leave me brokenhearted tonight
                                                               Come on, that's right
Never been in a sticky situation
Got on better trouble, yep and now I'm passive
                                                                Anything you wanna do, I'll be on it too
Five minutes, ten minutes, now it's been an hour
                                                                Everything you say, it's like a gold with a view
Don't wanna think too hard, but I'm stoward
                                                               Business on the front, party in the back
Oh oh, I can't seem to let you go
                                                               Maybe I was wrong, was the alf really wack
                                                               This kinda thing doesn't happen usually

See I'vebeen waiting all day
For you to call me baby

Not a single word, slipping on at the thrown
                                                                Come on, that's right
Just to call my next, oh oh
Poppin' bottles by the phone
                                                               When you gonna call
Oh yeah

Act me up, pad me down, turn me inside out
                                                                I've been waiting up
That's enough, hold me up
