

Katy Perry - This Moment

Tom: G

Can you tell me, who called the race?

Can anyone stay in one place?

And when you get to the finish line

Will you wish for more time?

But see, one day, one day you will

But maybe one day you will find

That you just can't push rewind

All we have is this moment

Tomorrow's unspoken

Yesterday is history

So why don't you be here with me?

All we have is this moment

To put our love into motion

Yesterday is history

So why don't you be here with me?

Be here with me now

Do you ever think that, we're just chasing our tails?

Like life is one big fast treadmill

And we pop what is prescribed

If it gets us first prize

But you know who I, who I think will win

Are the ones that love loving

Are the ones that take the time

All we have is this moment

Tomorrow's unspoken

Yesterday is history

So why don't you be here with me?

All we have is this moment

To put our love into motion

Yesterday is history

So why don't you be here with me?

Be here with me now

Be here with me now

'Cause the future is right now, right in front on you

Don't let the clock, the clock tell you what to do

A future is right now, I'm in front of you

Baby don't blink and miss

This moment

Tomorrow's unspoken

Yesterday is history

So why don't you be here with me?

All we have is this moment

To put our love into motion

Yesterday is history

So why don't you be here with me?

Be here with me now
