Kelly Clarkson - Standing In Front Of You

Tom: C

С You say it's easier Alone and undisturbed You said yes and danced before And got your feelings hurt You say most days your good Fm It's not so bad this room Watching the rain today Even though it's clear and sunny Em And you fight it so hard Fm G How to tell if it's real or not Take a breath and listen (listen) Open up stop wishin' (wishin') All that you've been missin' (missin') Standing in front of you Everything you're fearin' (fearin') All the walls are buildin' (buildin') Take a chance you're reason (reason) Standing in front of you Standing in front of you Fm Standing in front of you Standing in front of you You start to sway again Feelin' good in your skin You start to remember when You didn't have to try And then the glitter turns to dust Fm The color fades enough to make out pictures of a fire
