

## Ke\$ha - Praying

```
Intro: Gm F Bb
Gm F Bb
            Well, you almost had me fooled
                                                      F Bb
            Told me that I was nothing without you
                                               F
Oh, but after everything you've done
       I can thank you for how strong I have become
   'Cause you brought the flames
And you put me through hell
         I had to learn how to fight for myself
And we both know all the truth I could tell
I'll just say this is I wish you farewell
I hope you're somewhere praying, praying
                                                                                                                                F Bb Eb
I hope your soul is changing, changing
              I hope you find your peace

Gm F Bb Eb
Falling on your knees, praying
 (Gm F Bb)
            I'm proud of who I am
                                                      F Bb
            No more monsters, I can breathe again
       And you said that I was done
                                                                                                      F
          Well, you were wrong and now the best is yet to come % \left( 1\right) =\left( 1\right) \left( 1\right)
