Khai Dreams - Through And Through

Tom: Ab

```
m
I only think about it in the night time
             Db
Always in the night time
                    Gb
Up too late lying on the floor
Thinking I've been here for so long
Just a little too long
                          Abm
Think I need to get out of the door
But I've never been a brave one
              Db
Always was a tame one
                     Gb
Always double checked all that I knew
But that safety is a danger
Yeah there's only one way out it's through
```

[Refrão]

```
             Abm
Oh through and through
                 Db
Oh through and through I'll find my way to you
    Gb
Though I'll admit it may take me some time
           Abm
Oh through and through
               Db
Oh through and through
                         Gb
```

I will be there for you even if we may seek a separate light

[Pre-Refrão]

```
       B                            Db
And I don't know what I've been waiting for
                   Bbm
It feels like I'm always losing my way
        Gb
I'm doubting every step I take
Abm                    Db
I know that everything finds its place
             Gb
Although I wish I knew where to
```

I guess I'll have to see it through

[Refrão]

```
                         Abm
Oh through and through
                    Db
Oh through and through I'll find my way to you
        Gb
Though I'll admit it may take me some time
              Abm
Oh through and through
                  Db
Oh through and through
                           Gb
```

I will be there for you even if we may seek a separate light

(B   Db   Gb)
