you have to listen to hear the strumming pattern.

Interlude: This part is kind of tricky and a little hard to hear behind the second guitar. I would say that 3 or 4 of these 16 notes are wrong but it works. The second guitar plays an **A** over this and at the end slides up the neck to the 9th fret on the **G** string and the 10th on B. Then tremlo pick those two notes.

Gtr. 3 comes in with this about halfway through the interlude. Its probably wrong but the part that it is supposed to be is mostly for harmonic effect. My advice: Play either the Gtr. 1 or 2 parts.
