

# Lady Antebellum - Champagne Night

tom:

Intro: E A B E A B

The stars go out on the Sunset Strip

But after last call I still stay lit

Make?a 20 last like?it's Nineteen ninety

Way out here where we're from

We don't say, ooh-la-la, Perion

Don't need no bottle service budget (No)

Got no money, but we love it (Woo)

Raisin' plastic cups to a life of luxuries

C'est la vie on a Friday

We get dressed up in a blue jean tux

And we go where we don't hear the highway

Don't need doubles and bubbles

To get it all kinds of trouble

Out in the country

Don't need a crystal chandelier

To have a real good time

We're drinkin' beer on a champagne night

A champagne night

No velvet booths in our hometown bar

Our VIPs are drinkin' PBR

No, we don't need no high-rise skyline

View from the window

'Cause way out here (Way out here)

Where we're from (Where we're from)

We don't have to be fancy

To have a whole lotta fun

Raisin' plastic cups to a life of luxuries

C'est la vie on a Friday

We get dressed up in a blue jean tux

And we go where we don't hear the highway

Don't need doubles and bubbles

To get it all kinds of trouble

Out in the country

Don't need a crystal chandelier

To have a real good time

We're drinkin' beer on a champagne night

A champagne night

You'll never see us sippin' long-stem glasses

Even if we're in a Hollywood palace

We ain't on our own island

No, we ain't drippin' in diamonds

We're gettin' rhinestone

Raisin' plastic cups to a life of luxuries

C'est la vie on a Friday

We get dressed up in a blue jean tux

And we go where we don't hear the highway

Don't need doubles and bubbles

To get it all kinds of trouble

Out in the country

Don't need a crystal chandelier

To have a real good time

We're drinkin' beer on a champagne night

(We're drinkin' beer on a champagne night

We're drinkin' beer on a champagne night)

Drinkin' beer on a champagne night

(We're drinkin' beer on a champagne night

We're drinkin' beer on a champagne night)

We're drinkin' beer on a champagne night

## Acordes
