

# Lauren Jauregui - Always Love

tom:  
 A B? E Gbm E A B? E Gbm Abm

Don't strum, always play the riffs

E, F#m, E

[Verse 1]

Oh, it's kinda hard waking up in the morning without you

When I reach over and realize it's over

I just

let the memories wash over me

Through me and out of me

But they're still, on the sheets

And they stay there

So I'll lay there with you

[Chorus]

And even though it didn't work

It's always love, always love

And even though we hurt each other

More than once

It was love, always love

For all those times we locked eyes

When I was yours and you were mine

It's always love, always love

[Verse 2]

Nobody talks about walking away

When there's still love

Feeling so far after being so close is a mindfuck

You helped me grow into me

So I couldn't help but change

But changing not seeing

Some things that

I just couldn't change

E Gbm Abm

[Chorus]

And even though it didn't work

It's always love, always love

And even though we hurt each other

More than once

It was love, always love

For all those times we locked eyes

When I was yours and you were mine

It's always love, always love

[Bridge]

Mmm, love

Mmm, love

Mmm

[Chorus]

And even though it didn't work

It's always love, always love

And even though we hurt each other

More than once

It was love, always love

For all those times we locked eyes

When I was yours and you were mine

It's always love, always love

It's always love, always love
