

Lauren Jauregui - Back To Me

```
RITMO: ? para cada acorde
Intro: F Am F
                             F Am F
                                                             Mind if I take you down
I've been looking at you with a little something that you've
                                                              Get you high, am I aloud?
                                                              RITMO: ?? ??? para cada acorde
You've been looking at me with it I don't know what exactly
                                                              Better watch you try to turn your back to me
                                                              When I know that any minute you'll be back to me
                                                              Back, back, back to me
Play it cool, but I see through it you should listen to the
                                                              Back, back, back, back, back, back to me
                                                              Better watch you try to turn your back to me
Boy, I know you want it so you better get up on it or you'll
                                                              When I know that any minute you'll be back to me
lose it, lose it, lose it
                                                              Back, back, back to me
RITMO: ? para cada acorde
                                                              Back, back, back, back, back, back to me
                                                              RITMO: ? ? ? 4X
Mind if I slow you down
No reply, you'll come back
                                                              Know that any, know that any, know that any
RITMO: ?? ??? para cada acorde
                                                              RITMO: ?? ??? para cada acorde
                                                              Know that any minute you'll be back to me
Love to watch you try and turn your back to me
But I know that any minute you'll be back to me
                                                              Love to watch you try, love to watch you try
                                                              Feel me, feel me, feel me
Back, back, back to me
Back, back, back, back, back, back to me
                                                              Back, back, back, back, ba-ba-ba-ba
                                                              While you listen, while you listen
Love to watch you try and turn your back to me
                                                              While you, while you listen to the music
But I know that any minute you'll be back to me
                                                             While you listen, while you listen
Back, back, back to me
                                                              While you, while you listen to the music
Back, back, back, back, back, back to me
                                                              Love to watch you try and turn your back to me when I know
Baby could you shut up? Cause I don't need you to come up with that any minute you'll be back to me
                                                              Back, back, back to me, back, back, back, back, back,
I just need your eyes on me so I can see you watching me move
                                                             back, back, back, back
                                                              RITMO: ?? ??? para cada acorde
So soft and cryptic oh, while you listen to the music
                                                              Better watch you try, don't you back to me
Boy I know you want it so you better get up on it or you'll
                                                              When I know that any minute you'll be back to me
lose it, I'll prove it
                                                              Back, back, back to me
                                                              Back, back, back, back, back, back to me
```
