

Lauren Jauregui - Back To Me

```
lose it, I'll prove it
Intro: F Am F
                             F Am F
                                                             RITMO: ? para cada acorde
I've been looking at you with a little something that you've
                                                             Mind if I take you down
You've been looking at me with it I don't know what exactly
                                                             Get you high, am I aloud?
                                                             RITMO: ?? ??? para cada acorde
                                                             Better watch you try to turn your back to me
Play it cool, but I see through it you should listen to the
                                                             When I know that any minute you'll be back to me
                                                             Back, back, back to me
Boy, I know you want it so you better get up on it or you'll
                                                             Back, back, back, back, back, back to me
lose it, lose it, lose it
                                                             Better watch you try to turn your back to me
RITMO: ? para cada acorde
                                                             When I know that any minute you'll be back to me
                                                             Back, back, back to me
Mind if I slow you down
                                                             Back, back, back, back, back, back to me
No reply, you'll come back
RITMO: ?? ??? para cada acorde
                                                             Know that any, know that any, know that any
                                                             Know that any minute you'll be back to me
Love to watch you try and turn your back to me
But I know that any minute you'll be back to me
                                                             Love to watch you try, love to watch you try
Back, back, back to me
                                                              Feel me, feel me, feel me
Back, back, back, back, back, back to me
                                                              Back, back, back, back, ba-ba-ba-ba
                                                             While you listen, while you listen
Love to watch you try and turn your back to me
                                                             While you, while you listen to the music
But I know that any minute you'll be back to me
                                                             While you listen, while you listen
Back, back, back to me
                                                             While you, while you listen to the music
Back, back, back, back, back, back to me
                                                             Love to watch you try and turn your back to me when I know
Baby could you shut up? Cause I don't need you to come up with that any minute you'll be back to me
                                                             Back, back, back to me, back, back, back, back, back,
I just need your eyes on me so I can see you watching me move
                                                             back, back, back, back
So soft and cryptic oh, while you listen to the music
                                                             Better watch you try, don't you back to me
                                                             When I know that any minute you'll be back to me
Boy I know you want it so you better get up on it or you'll
                                                             Back, back, back to me
                                                             Back, back, back, back, back, back to me
```
