

Les Miserables - I Dreamed a Dream

```
Dbm
               tom:
               Eb (forma dos acordes no tom de D )
                                                              As they tear your hope apart
Capostraste na 1º casa
Intro: D
                                                              And they turn your dream to shame
There was a time when men were kind
                                                            (DDDA)
When their voices were soft
                                                            [Terceira Parte]
   And their words inviting
                                                              He slept a summer by my side
  There was a time when love was blind
                                                                         D
                                                              He filled my days
  And the world was a song
                                                                         Em
                                                            With endless wonder
 And the song was exciting
                                                              He took my childhood
 There was a time
                                                                   Bm A
                                                            In his stride
Then it all went wrong
                                                              But he was gone when autumn came
(DABmDGA)
                                                            (DAAMB)
[Primeira Parte]
                                                            [Quarta Parte]
 I dreamed a dream in time gone by
               D
                                                              And still I dream
 When hope was high
                                                            He'll come to me
             Em
And life worth living
                                                              That we will live
                                                                        Gbm B7
 I dreamed that love
                                                            The years together
            Bm A
Would never die
                                                              But there are dreams
                                                                        Dbm B
 I dreamed that God
                                                            That cannot be
             Em A7
Would be forgiving
                                                             And there are storms
                                                                       Gbm
                                                            We cannot weather
 Then I was young and unafraid
                 D
                                                            (B7 E B)
 And dreams were made and used
                                                            [Final]
      Α7
And wasted
                                                               I had a dream my life would be
                                                                        B7
 There was no ransom to be paid
                                                                So different from this hell I'm living
        D
 No song unsung
                                                                         В
                                                            So different now from what it seemed
No wine untasted
                                                                           В
                                                             Now life has killed the dream
[Segunda Parte]
                                                            I dreamed
 But the tigers come at night
                                                            (B Dbm B A B E)
Acordes
                                                                          ukulele-chords.com
```

With their voices soft as thunder
