

Lewis Capaldi - Almost

```
Done all I can, all I Do is try
                tom:
                D
                                                                To get through another night
        [Primeira Parte]
                                                                [Refrão]
 Standing back but on the edge
 Wide awake but laid in bed
                                                                I swear to God I'm almost alright
  The pain is real, but I'll pretend
                                                                I only think about you all the time
 That all the hurting has an end
                                                                I almost never fall asleep
                                                                Wishing you were here with me
[Pré-Refrão]
                                                                And I promise I've completely let you
Nowhere to run, nowhere to hide
No way to live, no way to die
                                                                I swear to God I'm almost okay
Done all I can, all I Do is try
                                                                I only talk about you every day
To get through the daylight
                                                                It almost never cut me deep
                                                                When I had to watch you leave
[Refrão]
                                                                And I promise I've completely let you
                                                                Go
I swear to God I'm almost alright
                                                                Almost
I only think about you all the time
                                                                [Ponte]
I almost never fall asleep
                                                                     Gbm
Wishing you were here with me
                                                                Almost
And I promise I've completely let you
                                                                Almost
                                                                [Refrão]
Almost
[Segunda Parte]
                                                                I swear to God I'm almost alright
                                                                I only think about you all the time
  Talking circles round the room
                                                                I almost never fall asleep
 Like I've got a point to prove
                                                                Wishing you were here with me
  Every word except the truth
                                                                And I promise I've completely let you
  To everybody else but you
                                                                Almost
[Pré-Refrão]
```

[Pie-Keilau]
